

DORMER ENGINEERING - 2008 PRICES (fixed for calendar year).

Prices are in Australian Dollars (AUD\$) and includes normal road freight charges within Australia.

The GST (Tax) is not applicable for sales outside Australia.

**THE FOLLOWING INFORMATION WILL HELP YOU UNDERSTAND OUR EQUIPMENT**

TO PRINT THIS PRICE LIST SET ALL MARGINS TO 0, OTHERWISE WILL PART PRINT EACH PAGE.

Our prices are fixed for the calendar year.

As from 2007 we included freight (parcel post or normal road freight) within Australia as part of the price.

For overnight airbags for item/s upto 3ks we use Aust Air Express (AAE) at current rates and charged as extra.

We do not have any accounts with domestic airfreight, most orders are heavy and too costly by airfreight.

We can send goods on your freight account.

Any order requiring a pallet is charged extra, POA.

The 'C' thread is a coarse thread (1 & 1/8" acme 4TPI modified) on our components and is now our standard.

The C thread has superceded our 'F' thread (Fine thread 5/8" whitworth) as we announced in 2001.

The F thread is still available from stock until year 2010 and after that only made to order.

The 2006 price list was the first year to not list prices for the F thread.

The sizes of the equipment are nominal only and designate the OD of the materials they are made from.

Each auger design cuts a different sized hole because of different cutter shapes and clearances.

For specific hole sizes talk to our sales people because we often customise augers to cut specific sizes.

We have 7 different designs for our sampling augers, some are general purpose and some are soil type specific.

Most sampling auger heads are 450mm long and welded to a shaft to bring them to 1.0m or 1.5m long.

Augers come with case hardened cutters as standard and most can have tungsten carbide added.

Most augers are painted steel as standard or can be made from stainless steel (add 45% to steel price).

The item code for stainless steel items has 'SS' before the thread type 'C' or a '/SS' after the 'C'.

Extension rods are threaded male one end and female the other and undo with the aid of Tommy Bars.

Extension rods are available in painted steel or aluminium or stainless steel and as 1.0m or 1.5m long.

Casing sizes are the OD of the casing and the ID is 10mm less.

The OD of the casing is flush fitted when joined and the inside has thicker sections at the threads.

The casings threaded ends are welded into lightweight tube and the threads are machined after the welding.

We have canvas carry bags for augers and kits and have toolboxes for large quantities or for lockable security.

The Drillmite is our hydraulic power unit that replaces the manual T-handle and has variable power control.

**PRICE LIST PAGES:**

Page 1 is this page with information for customers.

Page 2 to 4 are our prices.

Page 5 of 6 is the printed Terms and Conditions of Sale.

Page 6 of 6 is an Order Form (use is optional).

Note: Pages 5 & 6 are not always included, especially for emailing, to reduce the file size.

**Explanation of marks on price list and item codes:**

+++ - = this shown in sub-heading means item is not shown in our printed catalog

\* = this shown in left margin means unusual changes made to this item or price since last year

**ITEM CODES e.g. SA5010C/HD**

**SA** = sand auger

**50** = 50mm diameter

**10** = 1.0 metres long

= Material made from (if other than steel) A = aluminium, SS = stainless steel.

**C** = coarse thread (or **F** = fine thread being phased out by 2010)

**/ HD** = Heavy Duty version

Therefore a EXT4015AC =

Extension rod,

40mm diameter,

1.5 metres long,

aluminium,

coarse thread
